Summary:

Full Stack MERN Developer with hands-on experience in building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in REST API development, JWT authentication, and CRUD operations.

Education

Bachelor of Technology in Computer Science and Engineering

Indian Institute of Information Technology (IIIT-Surat), Surat CGPA: 7.24 | Currently in 4th Semester

Skills

Frontend : React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap

Programming : C, C++, Python, JavaScript

Backend : Node.js, Express.js, REST APIs

Database : MongoDB, MySQL

Tools & Tech : Git, GitHub, VS Code

Core CS : Data Structures & Algorithms, DBMS, OS, Problem-solving

Competitive Programming : Leetcode Rating : 1462 | CodeForces Rating : 766

Experience

Junior Developer — TNP Team

IIIT-SURAT | Mar 2026 – Present

- Contributing to development and maintenance of internal web applications
- Collaborating with team members using Git and GitHub for version control
- Assisting in feature development, debugging, and code optimization
- Gaining hands-on experience with MERN stack in a real-world environment

Full Stack Developer — Personal Projects

- Developed end-to-end MERN stack web applications with REST APIs, JWT, and MongoDB integration
 - Tech Stack: React, Node.js, Express, MongoDB, JWT, API(OpenRouter and groq)
 - Built backend services, handled database operations, and integrated frontend interfaces.
 - Used Git and GitHub for version control and collaborative development practices.
-

Technical Projects

EduTrack — Attendance Management MERN - [GitHub](#) | [Live](#)

- Developed a MERN-based attendance management system with subject-wise tracking
- Implemented REST APIs for real-time attendance updates and data retrieval
- Integrated MongoDB Atlas for efficient data storage and management
- Tech Stack: React.js, Node.js, Express.js, MongoDB
- Improved attendance tracking efficiency and reduced manual calculation effort for users

AI-Powered Notes Management System | MERN - [GitHub](#) | [Live](#)

- Built a full-stack MERN application with JWT authentication and CRUD operations
- Integrated AI-based summarization using modern AI SDK for automated note generation
- Deployed frontend on Vercel and backend on Render with MongoDB Atlas integration
- Reduced time required for note summarization using AI-powered automation
- Tech Stack: React.js, Node.js, Express.js, MongoDB
